RING SIZING CHART

IMPORTANT STEPS FOR MOST ACCURATE MEASUREMENT

1. Before printing this ring sizing guide, make sure that page scaling is set to "NONE" in your printer settings area.
2. Measure the line on the left to ensure it is exactly 2 inches.
3. If the measurement isn't accurate, please review your print settings again. Be sure you are printing at full size.

OPTION ONE - PAPER SIZER

1. Carefully cut out the paper sizer above. Be sure to make a small slit in the end for the ruler to slide through.
2. Wrap the sizer around your finger with the numbers facing out and slide the rounded end through the slit.
3. For an accurate measurement, pull the sizer tight over the widest part of your finger. This could be the knuckle.
4. Read the number that lines up next to the slit. This is your ring size.

TIPS FOR ACCURATE MEASURING · Measure your finger when it is at its largest during the day. · Don't measure when your finger is cold as it is at its smallest. Thicker bands will fit more snug than thinner bands!

OPTION TWO - MEASURE AN EXISTING RING

1. Use a personal ring that fits the desired finger.
2. Place the ring over the circle below. Match the inside edge of the ring with the closest circle. This is the inside diameter of the ring.
3. If the ring falls between two sizes, select the larger of the two.
